DATA-DRIVEN STRATEGY

PERFORMANCE INTELLIGENCE

SLIDE 1 · EXECUTIVE OVERVIEW

How Did the Business Perform Overall?

Across four years, the business generated strong revenue, maintained healthy profitability, and served a substantial customer base — establishing a solid foundation for continued growth.

$2.30M

Total Sales

Revenue generated across all years

$286.4K

Total Profit

Net profit accumulated

12.47%

Profit Margin

Overall margin efficiency

5K

Total Orders

Transactions processed

38K

Units Sold

Total quantity across categories

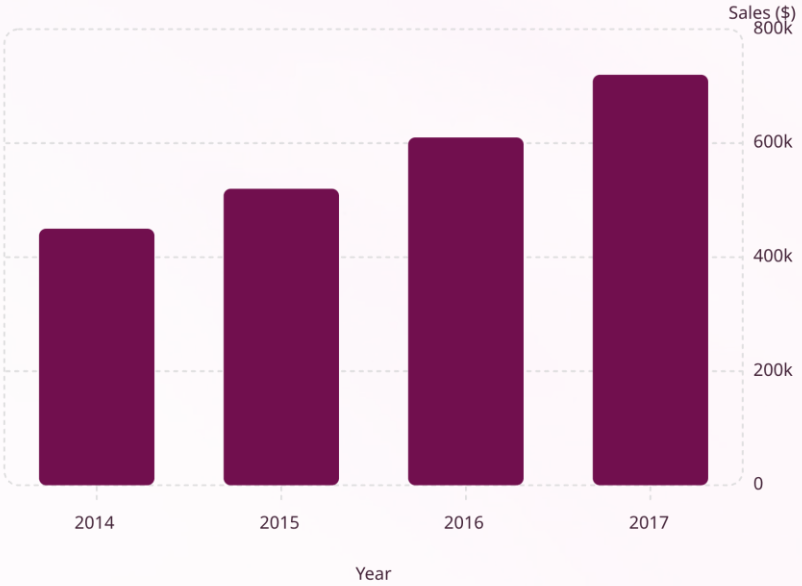
15.62%

Avg Discount

Mean discount applied per order

SLIDE 2 · SALES PERFORMANCE

How Has Revenue Evolved Over Time?



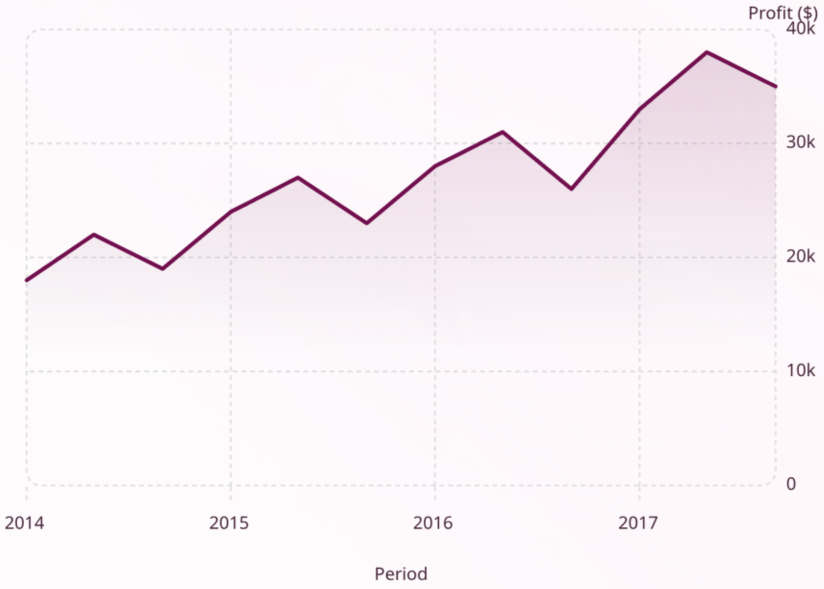
Steady Revenue Growth

Sales increased consistently year-over-year, reflecting successful market expansion and growing customer demand. **2017 delivered the strongest performance**, reaching the peak of the four-year period.

Key Takeaway: The business achieved its strongest sales performance in 2017, demonstrating sustained momentum.

SLIDE 3 · PROFIT PERFORMANCE

Is Revenue Growth Translating Into Profit?



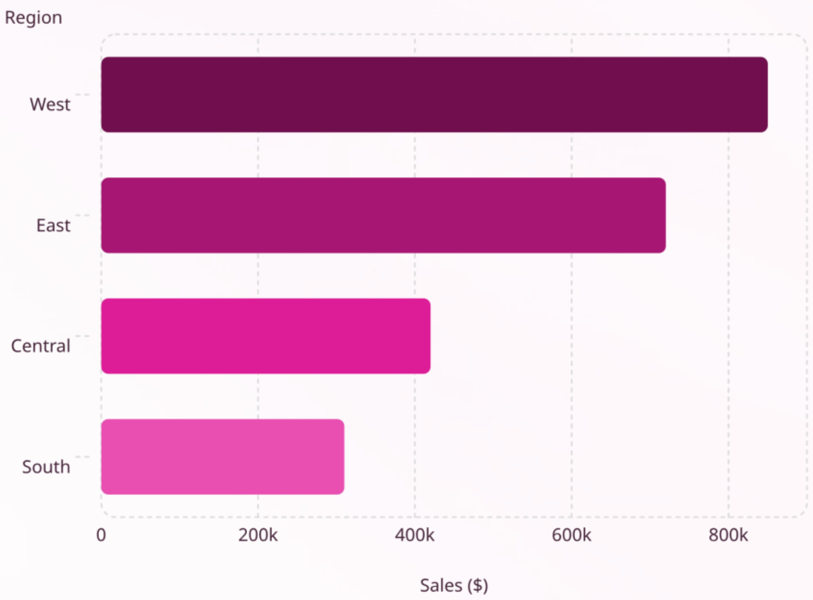
Healthy Profitability Throughout

Despite periodic fluctuations, profitability remained consistently positive and trended upward alongside revenue growth. Seasonal patterns are evident, with peaks typically occurring in mid-year periods.

Key Takeaway: The company maintained healthy profitability while scaling sales operations across all four years.

SLIDE 4 · REGIONAL PERFORMANCE

Which Regions Drive Business Success?



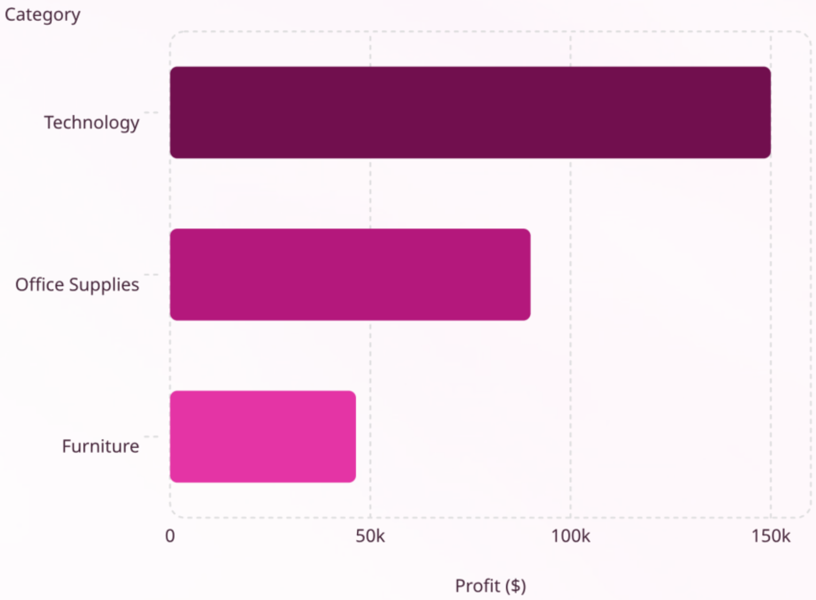
Concentrated Regional Performance

Revenue generation is heavily concentrated in the **West and East regions**, which together account for the majority of total sales. The South region remains significantly underdeveloped.

- **West:** Largest revenue contributor
- **East:** Strong secondary market
- **Central:** Moderate performance
- **South:** Untapped growth potential

⚠ **Executive Insight:** Regional diversification can reduce dependency on top-performing markets and unlock new revenue streams.

Which Product Categories Generate the Most Value?



Technology Leads Profitability

Technology is the dominant profit driver, contributing the highest profitability across all categories. **Office Supplies** delivers solid mid-tier returns. **Furniture** generates revenue but contributes significantly less profit relative to its sales volume.

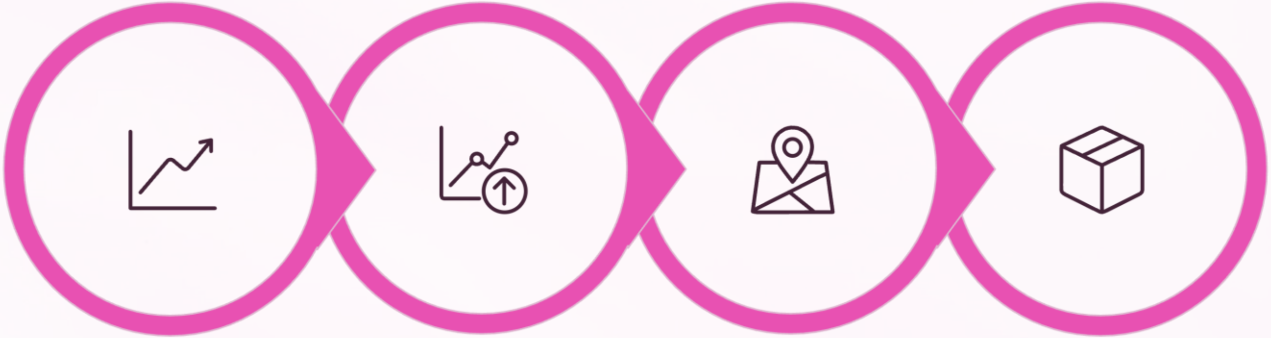
- **Technology:** Primary profit engine
- **Office Supplies:** Consistent contributor
- **Furniture:** Margin improvement needed

Key Takeaway: Not all sales generate equal business value — category-level margin analysis is essential.

SLIDE 6 · CONNECTING THE STORY

From Revenue to Business Value Creation

Business success follows a clear value chain — from top-line sales growth through to product-level profitability and regional contribution.



Sales Growth

Profit Growth

Regional Contribution

Product Profitability

Strong sales growth is underpinned by profitable product categories — led by Technology — and concentrated regional performance in the West and East. Understanding each link in this chain enables targeted strategic decisions.

SLIDE 7 · KEY BUSINESS INSIGHTS

Five Insights That Define Performance

$2.30M in Total Sales

Generated $286.4K profit at a 12.47% margin across 5K orders.

2017 Peak Performance

The strongest sales year, capping four years of consistent revenue growth.

West Region Dominance

The largest revenue contributor, with East as a strong secondary market.

Technology Leads Profit

The highest-profit category and primary driver of overall business value.

15.62% Avg Discount

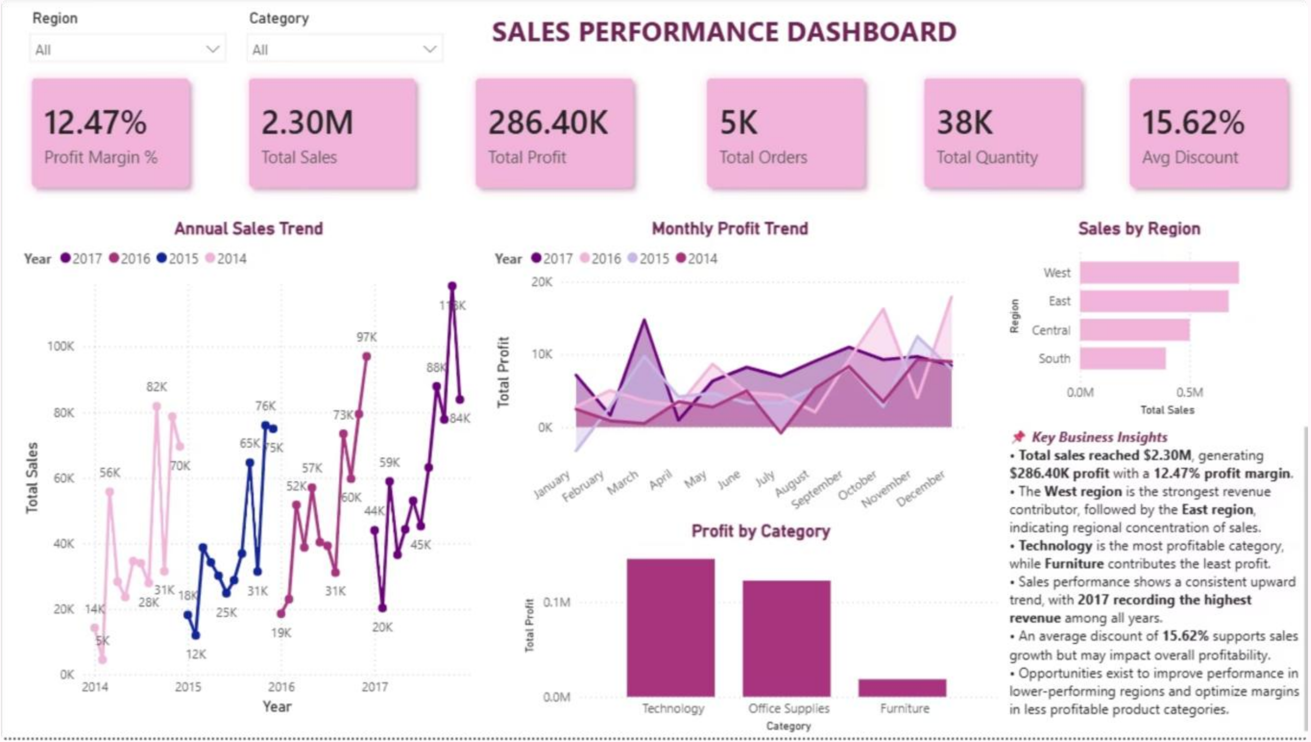
Supports sales volume but may constrain overall margin efficiency.

What Should Management Do Next?

A Focused Growth Agenda

Management should prioritize high-margin categories, optimize promotional spend, and activate underperforming regions to unlock the next phase of profitable growth.

- Replicate winning regional strategies
- Deepen Technology category investment
- Rationalize discount structures
- Address Furniture margin gaps
- Develop South and Central markets



Conclusion

The 2014–2017 analysis demonstrates that business growth is driven by strong sales performance, profitable product categories, and high-performing regions. Interactive dashboarding enables stakeholders to monitor performance, identify opportunities, and make data-driven decisions with confidence.
